## **Lakeway Regional Medical Center Invests Over \$3.5 Million in Technology and Equipment**

### *Significant Capital Investments Create State-of-the-Art Operating Rooms*

LAKEWAY, TX – October 19, 2015 – Lakeway Regional Medical Center today announced a \$3.5 million investment in technology and surgical equipment that allows for significant improvement of the surgical suites, as well as an expansion of operating room space needed to accommodate the growing surgical staff. This is being driven largely by the increase in the number of complex neurosurgical and orthopedic spine cases at the hospital.

“This multi-million dollar investment underscores our commitment to becoming the finest regional and destination medical center in Central Texas,” said Philippe Bochaton, CEO of Lakeway Regional Medical Center. “We have greatly enhanced the navigation and imaging systems with the addition of Medtronic’s StealthStation® S7® Surgical Navigation System and O-arm® Surgical Imaging System, as well as surgical tools in our operating rooms. We have also invested in the da Vinci® Technology, a sophisticated, state-of-the-art robotic surgical system which is minimally invasive and provides optimal outcomes for patients. Our team is focused on ensuring that our surgeons have the best available technology and provide the highest quality of care to our patients. This community demands it.”

Additionally, Lakeway Regional Medical Center is primed to become a regional training center for physicians across the country as the hospital is actively evaluating new technologies as they emerge on the market. Enhanced operating rooms, coupled with the renowned surgical teams already practicing complex surgeries at the hospital create a prime environment for such a center of excellence.

“This region is at an important juncture,” continued Bochaton. “There is exponential growth and the need is great to have a medical center that not only provides important emergency and

general acute medical care, but also is capable of performing some of the most sophisticated surgeries in the country. Lakeway Regional Medical Center is perfectly positioned to serve our community and the broader region in all of these areas.”
